Mounting Accessories

The top support helps holding your unit into place in the holder. The support is adjustable in order to fit with the height of your device. Perfect to use if you want to mount a holder onto e.g. your mountainbike for offroad biking.

The adjustable top support is available in two versions. The first fits all holders with small and large tilt swivel and adjustable holders adjusted with screws on the front. The second fits adjustable holders adjusted with screws on the back.

Item no.	Product
215695	Adjustable top support for a firmer fit. For mounting on all adjustable holders adjusted with screws on the back.
215696	Adjustable top support for a firmer fit. For mounting on all holders with large or small tilt swivel, but also on adjustable holders adjusted with screws on the front.
